Gabriel Charris Maia da Costa

Tampa, FL | gabrielcharris06@icloud.com

SUMMARY

Mechanical Engineering student at the University of South Florida (3.7 GPA) with hands-on field experience on a multi-million dollar wastewater treatment expansion, a 2nd-place structural competition result, and an independent research project applying statistical analysis to real infrastructure data. Fluent in English, Spanish, and Portuguese. Building core mechanics and materials fundamentals through Statics and Materials of Engineering coursework.

ENGINEERING EXPERIENCE

Field Engineer Intern — Garney Construction *Venice, FL | May 2026 – Aug 2026*

- Supported field operations across three crews (piping, 6-person; Biological Nutrient Removal, 8-person; Chlorine Contact Tank, 6-person) on the Venice Gardens Advanced Wastewater Treatment Conversion and Expansion Project, a multi-million-dollar upgrade doubling plant capacity from 3 MGD to 6 MGD
- Coordinated with field crews and project staff to keep construction documentation accurate and current across all three work areas

ASCE Student Chapter — Steel Bridge Team *University of South Florida | 2026*

- Selected as 1 of 10 students to represent USF Steel Bridge at the ASCE Symposium 2026; team placed 2nd in Stiffness
- Contributed to structural design and build preparation for a competition steel bridge, applying core structural and materials principles

Independent Research — Material Performance & Statistical Analysis *SHPE 2026 STEM Research Competition*

- Applied chi-square statistical testing to identify significant differences in poor-condition rates across materials, finding steel bridges highest at 7.5% and prestressed concrete lowest at 1.4%
- Analyzed Florida's 2025 FHWA National Bridge Inventory dataset to evaluate the relationship between bridge material type and structural condition

AutoCAD Design Graphics Coursework *University of South Florida*

- Produced technical drawings applying drafting standards and spatial visualization principles used across civil and mechanical design workflows

ADDITIONAL EXPERIENCE

Dining Hall Food Service Worker — Compass Group *Tampa, FL*

- Balanced consistent part-time work with a full engineering course load while serving 100+ customers per shift, maintaining a 3.7 GPA

Mathematics & Physics Tutor *January 2022 – December 2024*

- Tutored students in calculus and physics, strengthening the same quantitative fundamentals applied in engineering coursework

EDUCATION

University of South Florida — B.S. in Mechanical Engineering *Tampa, FL | Expected May 2029*

- GPA: 3.7 | LAC Scholarship Recipient
- Relevant Coursework: Statics, Materials of Engineering, Calculus III, Physics II, Intro to Design Graphics (AutoCAD)

Oxford International School *Panama City, Panama | Jan 2022 – Dec 2024*

- GPA: 4.9/5.0, Honor Roll Student | National Scholarship recipient for academic excellence

ACHIEVEMENTS

- 4th place of 10+ teams, Quality Leadership University Business Simulation — analytical decision-making and strategic planning
- Physics & Mathematics Olympiad Participant — Panama & Brazil, national-level competition

SKILLS

Technical: AutoCAD, Microsoft Excel, statistical analysis (chi-square testing), structural fundamentals

Languages: English, Spanish, and Portuguese (fluent in all three)
